Riyadh City

linkedin.com/in/sulaiman-mokhaniq

Product Engineer building scalable applications with **Flutter** and **Next.js**. Focused on turning **Figma** designs into production-ready features for apps with **100K+ users**, while leading large-scale technical community initiatives.

Education

Bachelor in Software Engineering 2022 – 2026
Riyadh, Saudi Arabia

King Saud University

Experience

Flutter Developer — Paseetah 2026

- **Accelerated app performance by 20%** (load speed, API response time) by redesigning state management and implementing intelligent API caching across two live production apps.
- Built and shipped core product features across two live apps (Paseet, Paseetah), including a **file upload and rendering pipeline** for the AI chat and **dynamic, data-bound table rendering** in chat — integrating AI models into the core product experience.
- Delivered **full RTL/LTR bilingual support** with persistent locale state and an **in-app update notification system**.
- Resolved cross-platform issues including a **horizontal/vertical swipe gesture conflict** and **chat table-rendering latency**, alongside a layer-level bug fix, improving app stability and responsiveness.
- **Improved design-to-development handoff speed by 15%** by translating Figma UI/UX designs into responsive features via Jira, in close **cross-functional** collaboration with product and design.

Frontend Mobile App Developer — Nugttah 2025 Jun – 2025 Aug

- **Built secure authentication flows for a published app with 100K+ users**, using Dart and Firebase — contributing production features to a live product at scale.
- **Reduced UI inconsistencies across iOS and Android by 20%** by partnering closely with the design team on cross-platform UX.

Head of Executive Committee – BIG O's Programming Contest (3rd Edition) 2025 Feb – 2025 Apr

- **Directed a national programming contest for 300+ participants**, owning end-to-end problem selection and event operations.

Projects

Wamdah – Classroom File Sharing Utility , 2026 Jul – Present
Next.js, TypeScript, Supabase (PostgreSQL, Storage, Realtime), Tailwind CSS

- Engineered **zero-login authentication** using **6-digit PINs** and **QR codes** across **3 sharing modes**, achieving **sub-30-second transfers** and the **1st place**, DAICOthon Hackathon (KSU).
- Architected a **direct-to-storage upload pipeline** with **Supabase Realtime** to bypass Vercel's serverless payload limits.
- Implemented full **RTL/LTR internationalization** (AR/EN), theming, and **auto-expiring file security** logic.

SmartSchedule – Intelligent Academic Scheduling Platform , 2025 Aug – 2025 Nov
Next.js, TypeScript, Supabase (PostgreSQL), Tailwind CSS, Yjs

- Engineered an **automated conflict-resolution scheduling algorithm** supporting **5 distinct user roles**.
- Implemented **real-time multi-user collaborative editing** using **Yjs (CRDT)**, maintaining **zero data loss** across **30+ concurrent sessions**.

Qalam – Arabic Calligraphy Digital Platform , *Flutter, Firebase, AI/ML, Agile Methodology* 2025 Aug – 2025 Dec

- Built and trained a **custom computer vision model** recognizing **10+ distinct Arabic calligraphy styles**.
- Delivered full-stack features (Flutter, Firebase) across a **4-month Agile sprint** in a **6-member team**.

TAHABEER – Quran Recitation Application , *Dart, Flutter, OOP, UI Design* 2023 – Present

- Architected secure **authentication**, **audio playback**, and **file handling** using strict **OOP** and **Clean Architecture** principles, sustaining a **99% crash-free session rate** over **18+ months**.

Awards

1st Place Winner — DAICOthon Hackathon (KSU) 2026 Jul 04

4th Place Winner – Projecton Hackathon 2025 Oct

Leadership & Volunteering

University Tech & Innovation Initiatives 2024 Aug – present

- Directed **3+ hackathons** with **130,000+ SAR in total prizes** and **500+ participants** across FinTech, Game Development, and Environmental Innovation tracks, overseeing **Executive, HR, and Technical committees**.

Skills

Engineering: Dart, Flutter, TypeScript, JavaScript, Next.js, Supabase, Firebase, SQL, Python
Product & Design: Figma (prototyping, design systems), Wireframing, Responsive UI/UX
Data & Delivery: Agile/Scrum, Jira, Git/GitHub, CI/CD (Vercel), QA testing, performance optimization
Leadership: Team Leadership, Strategic Planning, **Cross-Functional Collaboration**, Event Management (300+ participants, 130,000+ SAR budgets)
